Experience

Crest Data Systems

December 2025 – May 2026

Software Engineer Intern

Ahmedabad, Gujarat

- Developed a **Python-based Datadog integration** for remote VM environments, building observability monitors, dashboards, detection rules, and resolving integration reliability issues.
- Built **unit, functional, and end-to-end testing** for monitor execution, pipeline parsing, and detection-rule triggering; created AI-assisted functional testing workflows using **Claude skills.md**.
- Automated testing and deployment pipelines using **GitLab CI**, **Docker**, and **DDEV**-based environments.

Education

Institute of Technology, Nirma University

2022 – 2026

B.Tech. in Computer Science Engineering, CGPA: 8.4/10

Ahmedabad, Gujarat

Projects

InvestIQ — ML Based Crypto Trading Platform

[GitHub](#)

- Engineered ensemble ML system (**XGBoost**, **LightGBM**, **Random Forest**) achieving **78% accuracy** for crypto price prediction.
- Delivered full-stack web app with **FastAPI** backend and **React.js** frontend for real-time trading insights.
- Implemented automated retraining APIs leveraging **10+ technical indicators** with **TA-Lib** and **CCXT**.

Tripster — AI-Powered Multi-Agent Travel Planner

[GitHub](#)

- Designed intelligent travel platform using **LangGraph** and **LangChain** with advanced **LLM** models for autonomous trip planning.
- Orchestrated an **8-agent system** for autonomous, end-to-end itinerary generation.
- Engineered scalable **FastAPI** backend with async **Redis** caching; integrated remote **MCP** servers and **React.js** dashboard.

YTChat — RAG-Based AI YouTube Video Assistant

[GitHub](#)

- Built a **RAG-based** YouTube assistant using **LangChain**, **FAISS**, and **Sentence-Transformers** for semantic transcript search.
- Developed **FastAPI** backend with **Google Gemini** for real-time video Q&A.
- Created a **Manifest V3** Chrome extension with transcript ingestion and **HuggingFace** embeddings.

Competitive Programming

- Solved **600+** problems in Data Structures and Algorithms using **C++**, developing strong analytical and problem-solving skills.
- **LeetCode**: 1706 rating [profile](#)
- **Codeforces**: 1305 rating [profile](#)
- **CodeChef**: 1644 rating [profile](#)

Technical Skills

- **Primary**: Ensemble Learning, Agentic AI, Backend Development, Observability
- **Backend & Web**: Python, JavaScript, SQL, FastAPI, Node.js, React.js, REST APIs, PostgreSQL, Redis
- **AI/ML**: Generative AI, RAG, Agentic AI, LLMs, LangChain, LangGraph, FastMCP, FAISS, HuggingFace, TensorFlow
- **DevOps & Tools**: Git, GitHub Actions, CI/CD, Containerization (Docker), Datadog, Bash
- **Relevant Coursework**: Data Structures and Algorithms; Design and Analysis of Algorithms; Operating Systems; Computer Networks; Database Management Systems; Object-Oriented Programming; Software Engineering; Machine Learning; Feature Engineering
